- Corporate website design and management
- Development of custom business software and integrations

Projects

AI Micro Health Coach

JavaScript · Node.js · SQL Server · HTML5 / CSS3 · JWT

A modern, responsive web-based micro health tracking and recommendation platform. Users record daily sleep, steps, water intake, and stress data to receive if-else rule-based personalized micro recommendations. Secure REST API with JWT-based authentication, bcrypt password hashing, SQL injection protection via prepared statements, and input validation. Mobile/tablet/desktop-responsive dashboard with notification and data history screens.
